

## Interview Questions

**1. Tell me a little about yourself.**

Hello, my name is Nannapat Srimartpirom. I'm a senior in Computer Engineering. I decided to apply for a full-stack development position because I enjoyed creating websites in my Software Engineering course. I believe I'm good at managing and paying attention to overall details.

**2. What are your strengths?**

My strength is that I can meet deadlines and stay focused on my work.

**3. What are your weaknesses?**

My weakness is that I can't sit for long periods when coding. I need to take breaks to walk around because of health issues.

**4. What are your short-term goals?**

I want to complete my internship and gain more experience in coding.

**5. What are your long-term goals?**

I want to become an expert in coding and lead large projects.

**6. What do you want to be doing five years from now?**

I want to graduate and work at a major technology company.

**7. If you could change one thing about your personality, what would it be?**

I tend to overthink what others say, so I'd like to care less about that.

**8. What does success mean to you?**

Success is when I achieve the goals I've set for myself.

**9. What does failure mean to you?**

Failure is a lesson I need to overcome, and it helps me become a better version of myself.

**10. Are you an organized person?**

Yes, I like to plan my daily tasks. It makes life easier.

**11. In what ways are you organized and disorganized?**

I plan my day, deciding what to do at specific times, but I'm not great at keeping my room tidy.

**12. Do you manage your time well?**

I think I manage my time well because I don't feel stressed today.

**13. How do you handle change?**

I stay relaxed and gradually adjust to new environments.

**14. How do you make important decisions?**

I gather information, prioritize, and then choose the most suitable option.

**15. Do you work well under pressure?**

Yes, I adapt easily to new people and tools.
